

Nathan Serry

Engineering Sciences Student

Engineering Sciences student at Ghent University with hands-on experience in software development, API integrations and digital solutions.

Passionate about technology, engineering and solving complex problems. Experienced in professional software environments while combining technical expertise with communication, customer support and business understanding.

Experience

Twikey — Software Developer & IT Specialist

2022 – Present (school holidays)

Financial technology company focused on digital payment solutions.

Software Development

- Developed API integrations and software solutions for business applications
- Built SDKs in Python and PHP
- Contributed improvements to existing Java components
- Updated and maintained technical API documentation
- Worked with REST APIs and software integration workflows
- Assisted customers with technical implementation questions

Front-end Development

- Developed and improved web interfaces
- Worked with HTML, CSS and JavaScript
- Gained experience building practical solutions in a professional software environment

Technologies: Python · PHP · Java · JavaScript · HTML/CSS APIs · Documentation

Dinasport — IT & Digital Marketing Assistant

2025 – 2026

Combined technical knowledge with digital communication and business needs.

- Managed social media communication for multiple brands
- Created structured digital content and marketing campaigns
- Improved online presence through consistent communication
- Worked with websites and digital tools
- Translated customer needs into practical digital solutions

Education

Ghent University

Bachelor Engineering Sciences 2025 – now

Focus areas:

- Mathematics
- Physics
- Engineering
- Software development
- Technology

Secondary Education

Mathematics-Sciences 8h.

Languages

- Dutch – Native
- English – Fluent
- French – Good
- German – Beginner

Strengths

- ✓ Fast learner
- ✓ Curious and self-driven
- ✓ Analytical thinking
- ✓ Independent worker
- ✓ Clear communication
- ✓ Problem solving mindset

Skills: Digital marketing · IT support · Communication · Content creation

Swimming Instructor

2024 – 2025

Teaching swimming lessons to children aged 5–7.

Explained concepts clearly and adapted teaching methods to different learning styles.

Projects

Arduino Touchpad Prototype

University engineering project focused on designing and building a paper-based touchpad.

- Used conductive materials and Arduino electronics
- Designed methods for detecting touch input
- Combined hardware experimentation with software processing

Skills: Arduino · Electronics · Prototyping · Problem solving

Artificial Intelligence & Local Computing

Personal exploration of modern AI technologies.

- Experimenting with local AI models and AI-assisted workflows
- Exploring practical applications of artificial intelligence
- Building knowledge about modern software tools

Skills: AI tooling · Software development · Experimentation

Technical Skills

Programming

- Python
- PHP
- Java
- JavaScript
- HTML/CSS

Development Tools

- Git
- REST APIs
- Docker
- Odoo
- Arduino
- VS Code

Engineering

- Mathematical modelling
- Analytical problem solving
- Electronics
- Prototyping

Interests

- Software development
- Artificial intelligence
- Engineering innovation
- Electronics
- Technology exploration
